

THE SCOOP ABOUT PET POOP

Pick it up!

It's the topic no one wants to talk about: pet poop. It's dirty, smelly, and undesirable, but we have to pick it up. Why? Dog waste (and cat waste too) has harmful bacteria, pathogens, and parasites that get into our waterways when it rains. As much as we like to throw it in the bushes or forget about it, stormwater washes it into our storm drains, streams, ditches, and eventually into our lakes. That's where we get our drinking water from...think about that! Being a responsible pet owner means taking care of our pets and also taking care of the watershed that we share with thousands of people.

WHAT DO WE DO WITH PET POO?

Pick it up with a biodegradable bag and throw it in the trash!
Pet waste holds twice the bacteria compared to human waste.
